

Write a program to copy one string to another without using library functions.

```
int main() {  
    char s1[100], s2[100];  
    int i;  
  
    printf("\nEnter the string :");  
    gets(s1);  
  
    i = 0;  
    while (s1[i] != '\0') {  
        s2[i] = s1[i];  
        i++;  
    }  
  
    s2[i] = '\0';  
    printf("\nCopied String is %s ", s2);  
  
    return (0);  
}
```
